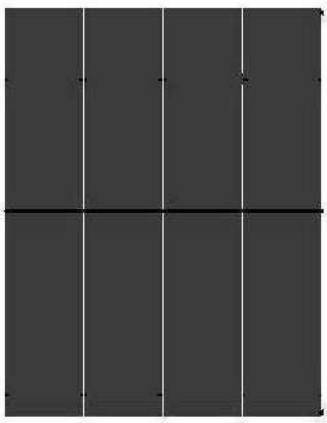
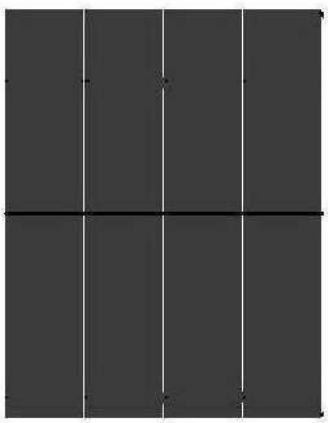
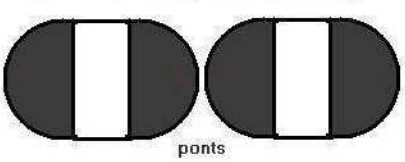
axes de roues





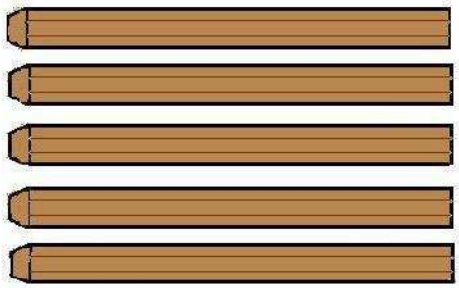


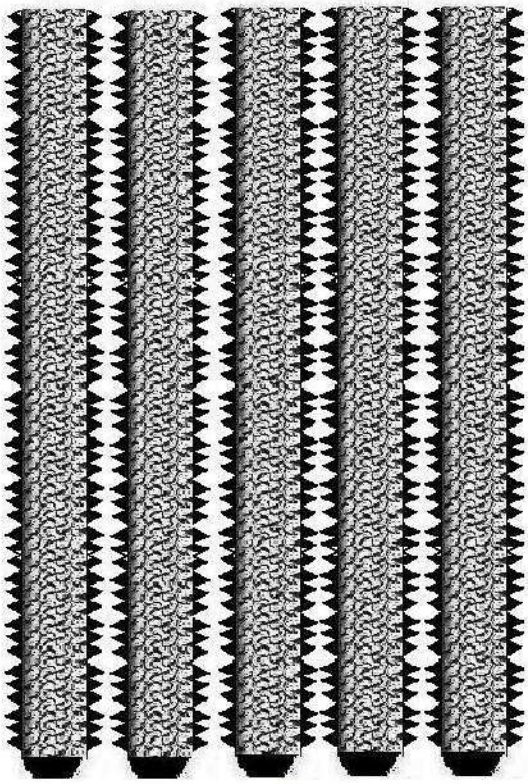
ponts

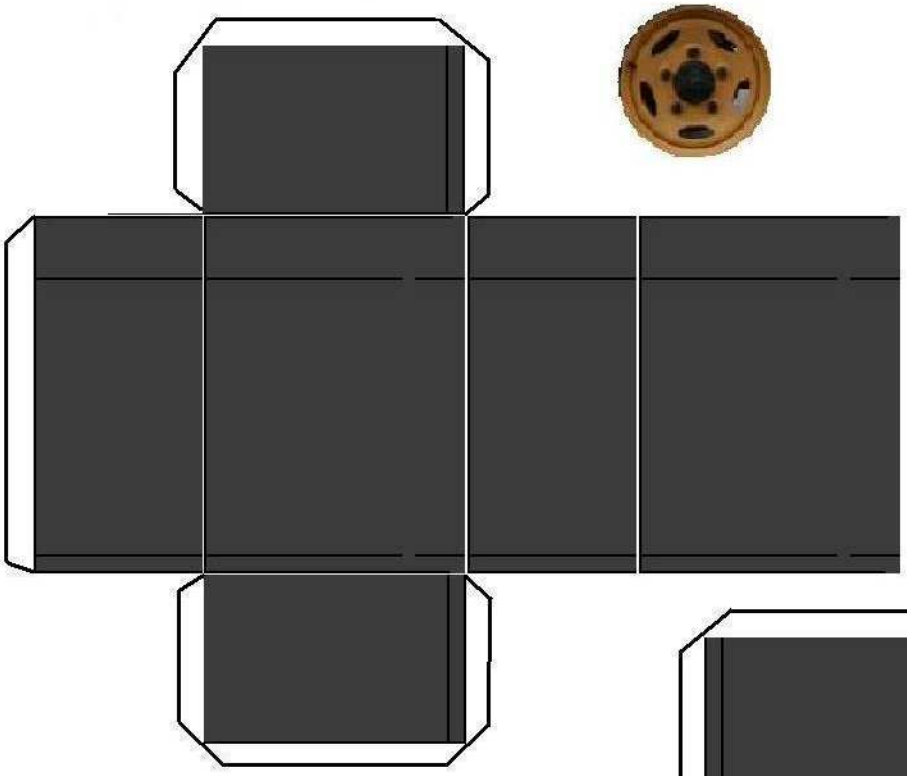
1 2

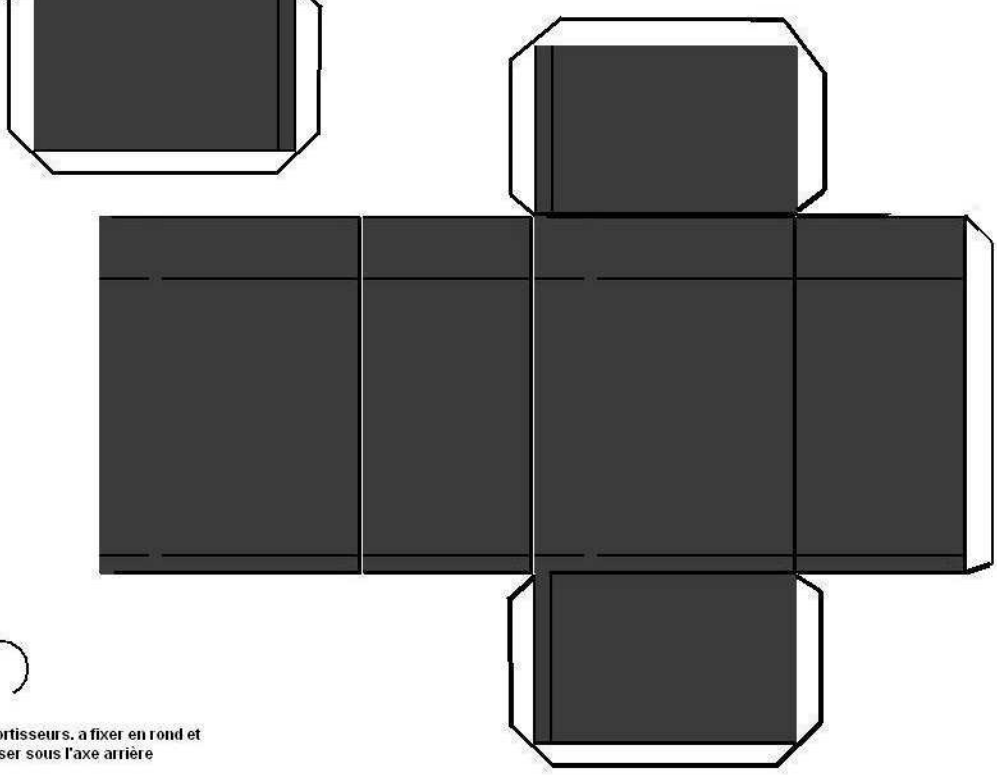
1 2

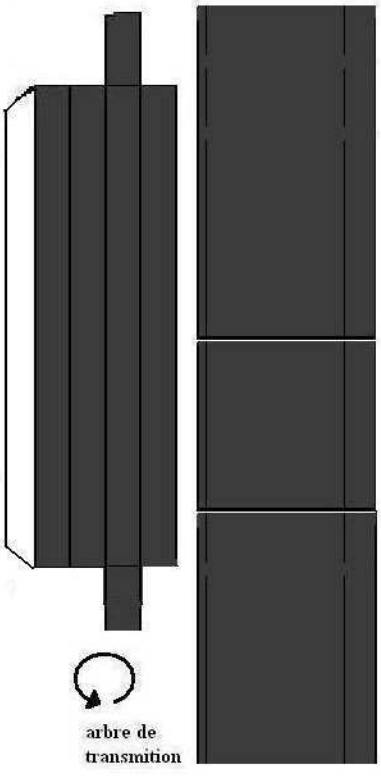
idem galerie, à réaliser de la même façon







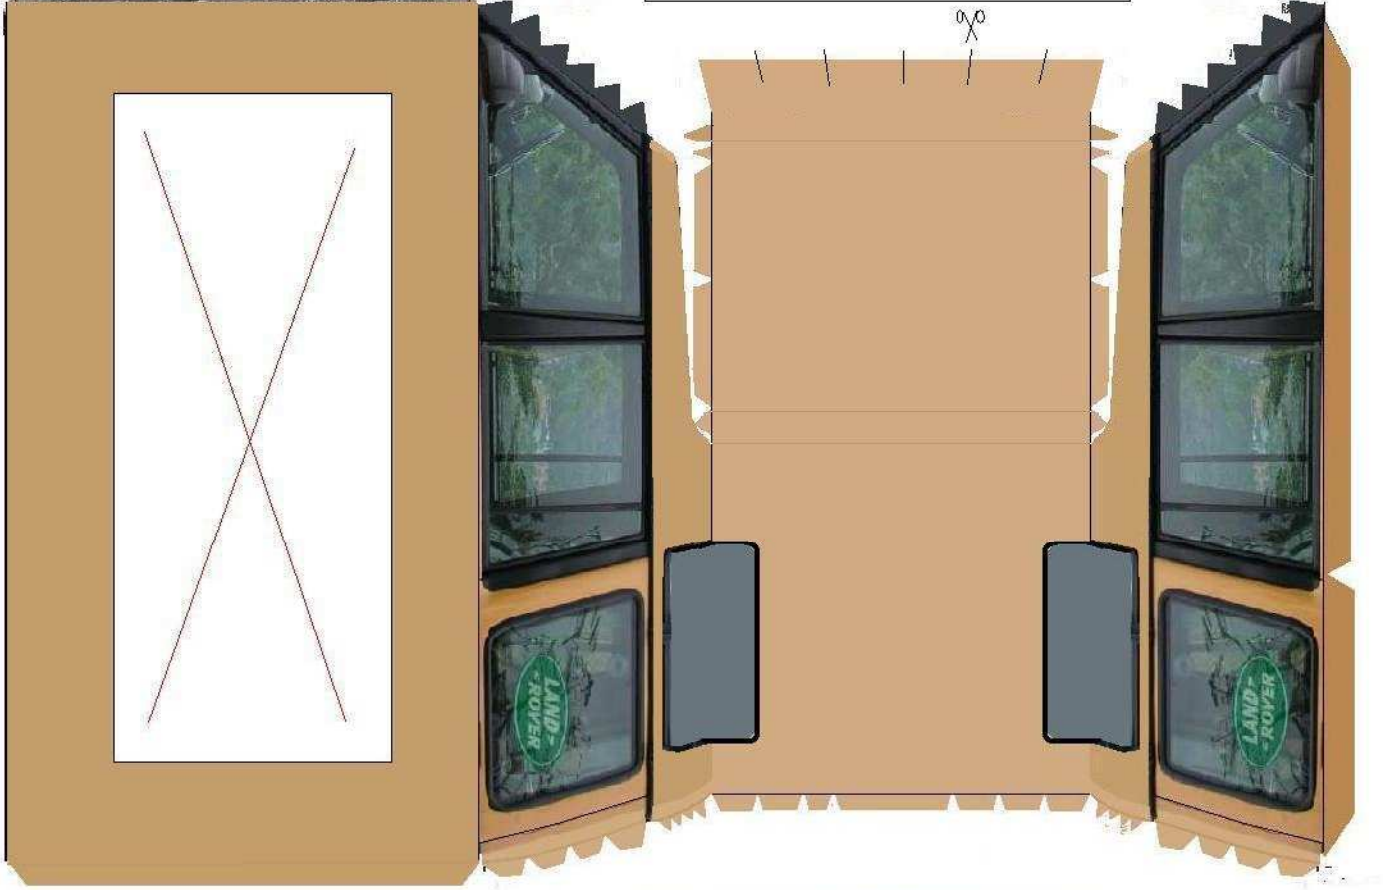


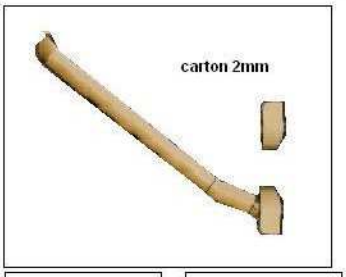


amortisseurs. a fixer en rond et glisser sous l'axe arrière

arbre de transmition

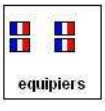
stikers portières avant





carton 2mm

sur les ailes arrières

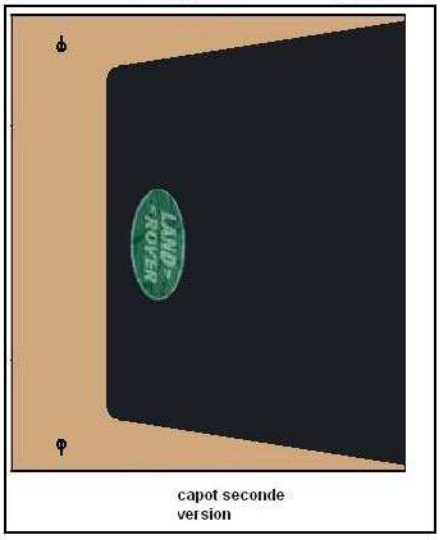


equipiers

vitres arrières

Les armatures metalliques sont à réaliser avec du fil de fer et peindre.
Les élements comme les feux sont à coller sur du carton de 2mm.
Les plaques "camel" sur du bristol.
Les plaques de désensablage se collent par d'eux pour réaliser recto-verso.

a coller l'une sur l'autre



capot seconde version
